

### Key Features:

- Ergonomically Designed for Comfort
- Compact & Portable
- A Choice of 3 Colours
- Easy Open Design for Easy Cleaning

### SalonAIR Features:

- Low Noise - Less Than 57dBA
- Remote Controlled
- Anti-Tamper Mode
- Digital Speed Control
- Blocked Filter Alarm
- 210w Power
- 115v/230v Single Phase
- Low Energy
- Exceeds COSHH and HSG258
- Quick & Easy Filter Changes
- 3-stage Filtration
- Filters Airborne Dust & Vapours
- Certified H13 HEPA Filter 99.95% Efficient @ 0.1µm
- Deep Bed Blended Carbon
- Choice of Capture Accessory
- Dimensions: 495 x 425 x 240mm (HxWxD)
- UKCA Approved

A complete Fume and Dust Extraction System, the FileOWAY® Downdraft Pod, when used with our SalonAIR® filter unit, has been specifically designed and manufactured by VODEX for the Nail Salon and Beauty Salon environment to remove harmful fumes such as Dibutyl Phthalate (DBP), Toluene and Formaldehyde that can be found in many nail polishes and acrylic nail treatments. It also removes fine airborne dust generated by nail filing and is ergonomically designed to assist with hand treatments.

The m. III version is now held together with magnetic strips instead of screws for ease of opening for cleaning. Always clean it with warm soapy water and dry well. Never use harsh chemicals as this could affect the powder coated finish. Available in: White, Grey or Pink!

The FileOWAY® III table top pod connects to our SalonAIR® filtration unit which sucks away and filters the harmful dust and fumes, allowing the clean air to be recirculated into the room. Note: Many "low cost" desk extractors simply recirculate the solvent laden air back around the salon.

The Pre, HEPA and Treated Deep Bed Carbon Filters in the SalonAIR® system, protects both yours and your clients health from invisible chemical fumes and airborne dust particles.

Pay with **Klarna**

**Harmful Fumes and Dust:** The hazards associated with quick-dry nail sprays, nail varnishes and removers, as well as nail extension materials need to be assessed under UK COSHH regulations. The main concern is the inhalation of dusts and/or solvent fumes produced when using acrylic and ketone products.

**No Need to Replace Existing Furniture:** Ideal for any salon environment, the FileOWAY® pod will fit easily into any salon without the need to replace existing nail stations or furniture.

**Note: The SA1001 will serve ONE FileOWAY® III Pod. We do not recommend running the FileOWAY III AND an extraction arm together as this will affect the extraction performance as the air volume will be shared between them.**
