Bench mounted, recirculatory, fume cabinets - 600mm / 900mm / 1200mm wide

FC5-60/ FC5-90/ FC5-120

The FC-5 is a compact bench mounted Fume Cupboard range ideal for laboratories where space is limited or where only small volumes of harmful substances are handled. Simply plug-in for immediate use. Harmful fumes pass through the units filters, re-circulating clean air back into the laboratory.

No need for expensive ducting due to the units recirculatory airflow.

The safety alarm will alert the operator if face velocity falls below 0.3 M/Sec.

Its ductless construction allows for the unit to be easily moved or relocated.

Carbon and HEPA filters are available to suit most laboratory applications— main filters ordered separately. (Pre filter included)

Internal lighting illuminates the work surface. The Acrylic construction also allows for easy cleaning. Clear Acrylic panels allow for tri-directional viewing. Stainless Steel drip tray and LED lighting included.
