

## Key Features

- Bench integrated with dust and fume extraction system
- Designed for seated work
- 5 Standard Sizes
- Wide range of filtration options
- 2mm steel
- Fully welded
- Powder coated

The heavy duty FPK range comprises 5 downflow benches designed for comfortable seated work with knee-space.

FPK Benches are designed for higher surface loadings but also ideal for applications requiring customisation or additional fittings, for example customer-specific mounting attachments.

FPK models can be supplied with a wide range of alternative filter configurations to suit different fume and dust extraction applications.

## Benefits.

**Easy filter access.** Simple access to filters via perforated top allows for easy maintenance and fast filter changes.

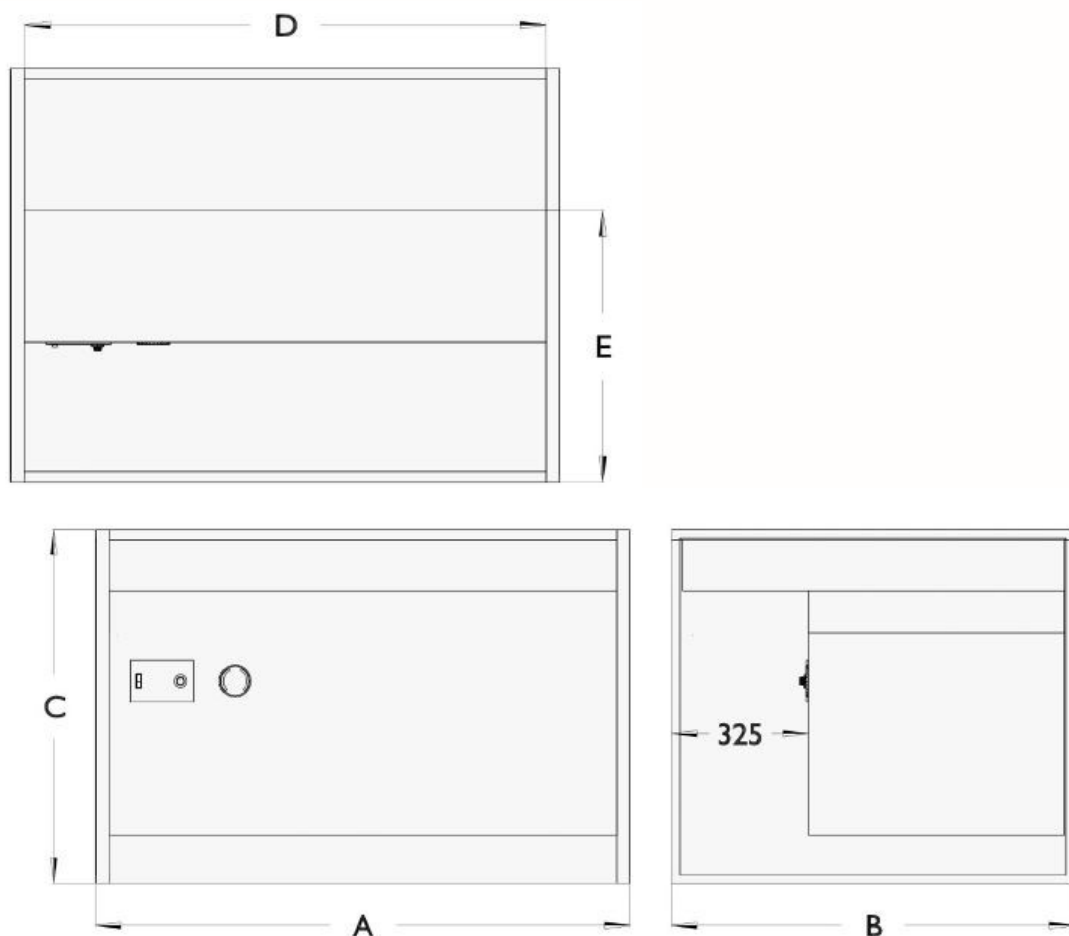

Ranging from a simple on/off switch on a single unit, to timed run or centrally controlled daisy chained systems for multiple installations.

**Speed control is available as a simple option.** Every unit is fitted with filter condition monitoring via a pressure loss gauge.

The FPK range features a ventilated area of 2/3 of the top surface; meaning you can work anywhere on the front region of the bench and still have effective extraction.
