

Dusty Evo - The new High Vacuum extraction

Dusty Evo is very easy to use and a must for every workshop. With **manual filter cleaning** for fume extraction on **extraction torch, slot and funnel nozzles**. Thanks to the large handle the unit is also suitable for **mobile use** on construction sites and repair work. It is hardly larger than a small trolley.

Benefits / Features

- High extraction capacity of **260 m³/h** thanks to two high-performance turbines
- Improved comfort due to optional connectable **automatic start/stop system**
- Großer Large **6 litre** dust collection container for longer cleaning intervals
- Robust sheet steel construction for torch extraction, Slot and funnel nozzles
- **Easy to transport** on construction sites and in confined spaces thanks to handle, **recessed grips on the sides** and **comfortable wheels**
- Easy to maintain, mechanical cleaning and **low-dust particle disposal**
- Optimum adaptation to the welding process due to infinitely variable extraction power regulation

Technical Data

Filter method	manual cleaning
Filter surface	1.35 m ²
Type of filter	ePTFE membrane Cartridge Filter
Filter efficiency	≥ 99.9 %
Extraction capacity	260 m ³ /h
Dimensions (w x h x t)	410 x 472 x 1004 mm
Weight	29,5 kg
Hose connection	Ø 1 x 45 mm
Dust collection tray	6 L
